

Waiting for grade

Instructions

1. First, select three quotations from *A Long Walk to Water* that you consider important. You may use quotations you have included in any previous assignment, or you may access the novel online (see Unit 2 Resources for link) and choose from there.
2. Once you have selected your quotations, put each one into its own sentence smoothly, **punctuating and giving the correct page number in parentheses**. Use the "tips on using quotations" resource in the Unit 2/Literary analysis essay folder for assistance.

Important note: For this assignment, *how* you introduce or explain a quote is not very important; what matters is that *you do introduce or explain it, in the same sentence as the quote itself*. Do not just drop a quote by itself on the page, and do not put your introduction/explanation into a separate sentence. **We are working here on integrating quotations into your own sentences.**

Example 1 (with your "introduction" before quote): Park writes, "Their region was inhabited by large herds of antelope, wildebeest, gnus--and the lions that preyed on them" (31).

Example 2 (with your "explanation" after quote): "Then Salva saw the telltale flick of a crocodile's tail as it flopped into the water near the young man," Park writes (31).

Your answer

The three quotations I chose were "At last everything was ready...he he canoe tightly as floated onto the Nile" gripped the side of the canoe" (44), No one got any sleep that night. The mosquitoes made sure of that." (50), and "The Gilo river was known for something else too. Crocodiles" (75).

Park writes "'At last everything was ready...he he canoe tightly as floated onto the Nile" gripped the side of the canoe" (44) I think this is important because Salva is relieved that they finished the canoe but is scared when he is in them because it might tip over.

Park writes "No one got any sleep that night. The mosquitoes made sure of that." (50) This is important because mosquitoes can transmit deadly diseases.

Park writes "The Gilo river was known for something else too. Crocodiles" (75). This is the most important quote I have because Salva is on the edge of dying because crocodiles are super deadly when they are in water and are natural born killers.
